BLACK FINISHES

The Timeless Beauty of the Black Finish

Black is back. But really, did it ever leave? It's the new neutral. It's the finish of choice that can make a dramatic statement that owns a space, or simply is happy complementing what's around it. As a finish, it's a classic that never goes out of style.

What the little black dress is to a wardrobe, a black finish is to home décor. It works beautifully with what's trending, like saturated colors and earth tones, and it can be an integral part of any style. From lighting fixtures to faucets and hardware to appliances, black finishes bring a refined and elegant look to your home.
