Why Choose Kichler LED Ceiling Fans?

REPLACEABLE LIGHT SOURCE

All Kichler® LED light sources, whether an integrated module or lamps, are replaceable, which makes them an easy choice for a long-lasting fixture.

ENERGY EFFICIENCY

LED light sources are up to 90% more efficient than fluorescent or incandescent light sources.

TESTED & APPROVED

Kichler® integrated LED light sources are tested and approved to meet our rigid engineering standards and quality assurance requirements.

ENHANCED LIGHT OUALITY

Kichler® integrated LED light sources produce 1,600+ lumens of light, greater output than two 60W incandescent bulbs or one 100W incandescent bulb. And with a Color Rendering Index (CRI) of 80, Kichler LED light sources help you more accurately see the color and subtleties of the objects being illuminated.

LESS WATTAGE EQUALS LESS WASTE

Most Kichler® integrated LED modules use only 17W versus a 100W incandescent bulb, resulting in significant energy savings.
