

# Symbol Guide & Notes

## SYMBOL GUIDE

### DC MOTOR CEILING FANS

The ultimate in energy-efficient operation

### ENERGY STAR® CEILING FANS

The trusted, government-backed symbol for energy-efficient products

### LED LIGHT KIT CEILING FANS

Feature a long life, light source that is extremely energy efficient

DAMP LOCATIONS

### DAMP-RATED CEILING FANS

Engineered for high-humidity areas

WET LOCATIONS

### WET-RATED CEILING FANS

For open or direct exposure to sun, rain or water spray

DRY LOCATIONS

### DRY-RATED CEILING FANS

Rated for indoor use only and are NOT intended for damp or wet locations

Federal Communications Commission devices designated with this logo comply with part 15 of the FCC Rules

## NOTES

- Bulbs not included unless otherwise noted.
- Wattages stated are the maximum recommended; however, you may use lower wattage lamps to suit your lighting needs. Some recommended lamps are not available in the maximum allowable wattage.
- All electrical products are rated as 120-volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA/ETL Standards for use in U.S. and Canada except where noted.
- All products featured in the outdoor section are certified and listed to UL/CSA/ETL standards for wet location except where noted.
- Many long-life tungsten halogen capsule lamps are now available as alternates to conventional incandescent light bulbs. The halogen capsule lamps may be used to replace any lamp of a higher wattage, but not to exceed the existing specified maximum wattage, i.e., 72W may replace a 75W.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants and other forms of weathering.
- To serve you better, Kichler reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.
- Kichler® lighting products are not produced or associated with any Native American Indians, nor are they a Native American product or the product of a particular Indian, Indian tribe or Indian arts and crafts organization as defined by 25 U.S.C. §305 et. seq.

## CONSUMER NOTICE

### Federal Legislation to phase out 100W incandescent bulbs started January 2012.

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310–2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards started with 100W bulbs in January 2012 and will end with 40W bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40W or more than 150W). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps, and plant lights.

By 2020, a second tier of restrictions will become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt (similar to current CFLs). Exempt from the Act are reflector flood, 3-way, candelabra, colored and other specialty bulbs.

Many governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy-efficient lighting alternatives, such as compact fluorescent lamps (CFLs) and LED lamps.

We go to great lengths to assure the metal, glass finishes and blades shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand-applied finishing will cause some differences between the printed images and actual product, and from one product to another.

We use only non-ferrous materials on the exterior parts of our outdoor products, and use the best available weather-resistant finishes. However, due to some extreme environmental conditions such as acid rain, salt air and ultraviolet exposure, we cannot guarantee our exterior finishes, with the exception of our LifeBrite® lanterns.

Due to environmental conditions such as soil acidity, concrete alkalinity and other corrosive soil and air conditions, we cannot guarantee our direct burial posts.
